

# Astrology is a Science or Not

Dr. P. Seshu Mani

*Junior Lecturer in Physics, Govt. Jr. College, Dagadarthi, SPSR Nellore Dt, Andhra Pradesh*

**Abstract- Depending on the position of the nine planets, at the time of birth of a human being and the birthplace of a person, their future means, about their field of study, whether they live happily or not, what is their interested fields in their life etc., explained by astrologists by using Janmakundali. Try to evaluate this concept is correct or not is discussed here.**

## 1. INTRODUCTION

In the olden days when a baby is born then the parents go to an astrologist who can tell them the birth time and place of a newborn baby. Then astrologist draw a Janamakundali which consists of position of all planets in different places from which they have studied the life of a baby and tell the parents about their children's future. In history Varahamihirudu an astrologist said that the king's son will die due to a pig. The King ordered that no pig should enter into the capital. No matter how hard he the King tried his son died because of a toy pig which was founded on his chest during his birthday. Is this accidentally occur or says exactly correct. First I think that these things are assumptions only, but after careful examination I assume that these issues are not assumptions but they are correct based on the following theories.

A person's brain has electromagnetic field explained by William Uttal (1), Johnjoe McFadden (2) (3) (4) and Susan Pocket (5).

## 2. GENERAL INTRODUCTION TO SOLAR SYSTEM

Planets moves in elliptical orbit around sun, with sun is present one of its foci. In history the Mahabharatam Holy book explained that lifespan of a person is different in different planets. In the case of a great warrior of Muchikunda fight from the side of God's against monsters. After completion of war he came to earth, gods calculated his life, it is small so that he can sleep and rest his remaining life till the death. The nine planets in our Solar System are 1. Mercury 2. Venus 3. Earth 4. Mars 5. Jupiter 6.

Saturn 7. Uranus 8. Neptune 9. Pluto. Earth rotates about its own axis at an angle of 23.5 degrees.

## 3. GENERAL INTRODUCTION TO ASTROLOGY

According to Astrology the nine planets are

- 1 Surya (Sun)
- 2 Chandra (Moon)
- 3 Angaraka (Mars)
- 4 Budha (Mercury)
- 5 Brihaspati (Jupiter)
- 6 Shukra (Venus)
- 7 Shani (Saturn)
- 8 Rahu (North Node of the Moon)
- 9 Ketu (South Node of the Moon)

The stars called Nakshatras. There are 27 Nakshatras, on which Moon rotates 27 days to complete one rotation around the Earth in which with one for Nakshatra approximately one day. The names of the Nakshatras are 1. Ashwini 2. Bharani 3. Krittika 4. Rohini 5. Mrigashirsha 6. Arudra 7. Punarvasu 8. Pushya 9. Ashlesha 10. Magha 11. Purvaphalguni 12. Uttaraphalguni 13. Hasta 14. Chitra 15. Swati 16. Visakha 17. Anuradha 18. Jyeshtha 19. Mula 20. Purvashadha 21. Uttarashadha 22. Shravana 23. Dhanishtha 24. Shatabhisha 25. Purvabhadrapada 26. Uttarabhadrapada 27. Revati. The angle made by each Nakshatra is 13 degrees 20 minutes (13 degrees 20 minutes multiplied by 27 = 360 degrees) in one complete rotation of moon around the earth. Each Nakshatra is divided into four parts known as four Padas. There are 12 zodiac signs, which are irregular in size and shape but each makes an angle 30° in the circle. List of 12 zodiac signs or Rasi's are given in Table 1.

Table-1

S.No	Names of Rasi	Sanskrit Name	Pada's	Month
1	Aries	Maeshum	Aswani,Bharani,Krittika ! st Pada	March21 _ April 19
2	Tarus	Vrushbham	Kritika 2,3,4, Pada, Rohini, Mrigasira 1,2 Pada	April 20 _ May 20
3	Gemini	Mithunam	Mrigasira 3,4 Pada,Ardra,Punarvasu 1,2,3 Pada	May 21 _ june 21
4	Cancer	Karkatakam	Punarvasu 4 Pada, Pushya, Asklesha,	June 22 _ July 22
5	Leo	Simham	Makha, Purvaphalugni, Uttaraphalguni 1 st Pada	July 23 _ august 22
6	Virgo	Kanya	Uttaraphalguni 2,3,4 Pada, Hasta, Chitra 1,2, Pada	August 23 _ September 22
7	Libra	Thula	Chitra 3,4, Pada, Swati,Visakha 1,2,3,Pada	September 23 _ October 23
8	Scorpius	Vruschikam	Visakha 4 Pada, Anuradha, Jyeshtha	October 24 _ November 21
9	Sagittarius	Dhasnussu	Mula, Purvashadha, Uttarashada ! st Pada	November 22 _ December 21
10	Capricornus	Makaram	Uttarashada 2,3,4 Pada, Shravana, Dhanishtha 1,2Pada	December 22 _ January 19
11	Aquarius	Kumbham	Dhanishtha 3,4 Pada, Shatabhisha, Poorvabhadrapada 1,2,3 Pada	January 20 _ February 18
12	Pisces	Meenam	Poorvabhadrapada 4 Pada, Uttarabhadrapada,Revati	February 19 _ March 20

#### 5. WHY SUN AND MOON ARE ADDED IN ASTROLOGICAL PLANET SYSTEM

Sun is the nearer star to the Earth. In solar system sun gives energy to the planets, then only existence of life is possible in planets. We know that Earth is one of the planets revolves around the Sun. Life present on the Earth due to solar radiation. The sun gives electromagnetic waves, those waves are incident on all living things on the Earth, so electromagnetic waves interfere compulsory with human beings Electromagnetic field. The Sun electromagnetic field must affect the life of a person on the Earth. So, Sun is taken as one of the Astrological planets in Hindu Astrology.

The nearest object to the Earth's surface is Moon. Moon revolves around Earth in closet approach than any other planet/star/galaxy. The effect of Moon on Earth is amplified, causes huge tides on full moon day and no moon day. So, Moon is taken as one of the nine planets in Astrology. From the above reasons Sun and Moon are considered as astrological planets in Hindu Religion.

#### 6. MY EXPECTATIONS ABOUT RAHU AND KETU IN ASTROLOGICAL SCIENCE

The line of intersection of the Earth's North Pole and Sun's North Pole at Moon's North Pole is known as the Chaya (Shadow) Graha Rahu. At the place of Rahu total or combined North Pole effect of Earth, Sun and Moon is concentrated, means amplified the effect. This total effect of magnetic field of Rahu is

observed on human beings. This North Pole effect is considered as one of the nine planets in Hindu Astrology. This planet is taken as Chaya Graha, which cannot see with our eyes, but their effect falls on the life of human beings. Moon is very near to the earth. So, our body magnetic field much more effected by the assuming Chaya Graha Rahu. The total time of nine planets in human beings lifetime is taken as 120 years. In which Rahu period is considered as approximately 18 years.

The line of intersection of Earth South Pole, Sun South Pole are present at Moons South Pole is considered as Ketu Graha. At this place all three planets (Earth+Sun+Moon) South Pole effect is combined and plays a vital role on human beings. In Hindu Astrology this total effect is named as Ketu Graha and given place in nine planets.

#### 7. WHAT IS THE EFFECT OF NINE ASTROLOGICAL PLANETS ON HUMAN BEINGS

The space around a magnet at which their influence is felt is known as magnetic field. The nine planets in Astrological Science are

1 Sun: nearer star to the Earth producing strong electromagnetic field which effected a person brain more strongly.

2 Moon: a natural satellite to the Earth, nearer object in which their effect on persons brain is enormously high.

3 Mercury: This planet lies between Sun and Earth, the first planet from sun their effect on a person on earth is more.

4 Mars: It is a brother planet to the Earth; it appears as red because soil on mars seems to be rusty iron color. Their patches of magnetic field effect a person's electromagnetic field who is on Earth.

5. Venus: It is the sister planet to the earth because its surface consists of metals and silicate materials. Their very low magnetic field also effect a person's electromagnetic field.

6. Jupiter: Jupiter's magnetic field is 20000 times greater than magnetic field of the Earth. This strong magnetic field effect the magnetic field of a person on Earth.

7. Saturn: Saturn is a gas giant planet having strong magnetic, which effects a person's electromagnetic field

8. Rahu: The combined magnetic field of Sun and Earth is concentrated on Moon's South Pole is called Rahu. Actually, this a shadow planet but we cannot see it with our eyes, but they effect the persons electromagnetic field.

9. Ketu: The combined magnetic effect of Sun and Earth South Pole is concentrated at Moon's South pole is known as Ketu. Ketu's magnetic field also effects a person's electromagnetic field.

According to Astrology these are the nine planet's effect a person's life. If we know place of birth, time of birth, date then we can draw Janmakundali, consists of 12 houses and 360 degrees of complete life of a born baby according to the position of nine planets. From this diagram a person's wealth, education, marriage, career, favourable time in their life and business etc. can be estimated/calculated. If doshas (negative effects of a planet which affect any relative like father, mother, uncle etc) are present at the time of birth, their remedies of all these doshas are taken according to Vedic Astrology.

#### 8. IS SCIENCE SUPPORTS ASTROLOGY

According to science Sun is one of its foci all planets rotate around the Sun in fixed orbits. This can be seen with telescope, artificial satellite, orbiter instruments etc. The effect of any field is limited to certain boundaries. Human beings brain has electromagnetism producing electromagnetic waves in all directions. They receive waves from different Astrological planets. Sun producing enormous electromagnetic field, Moon is very near to earth than any other planet and his effect is also more,

Chaya Graha Rahu and Ketu (Moon's northern nodes and Moon's southern nodes respectively) are also nearer to the Earth and their effect on a person on the Earth is also considerable, the electromagnetic field of Jupiter and Saturn are more effective. Mercury magnetic field is considered approximately zero, is known as Napunsaka Graha (transgender), means there is no (nearly zero) magnetic field. Our Milky Way has also ordered huge scale magnetic effect. This magnetic field does not considerably affect a person. So the given nine planets are only used in Astrology to effect a person's brain electromagnetic field strongly.

#### 9.CONCLUSION

Science supports the effect of magnetic field of all Astrological planets on humans. The formation of brain for all human beings is same. But some persons are intelligent in medicine, some persons are in technology, and some are in business, no two person's thinking is not same for doing the same work, their married life is not same, this can be explained by Astrologist by drawing Janmakundali. In this universe nothing is stationary. All the objects like planets, stars, galaxies move recedes with high velocities. So, we consider Astrological distances from Earth only. Because we cannot define the position of an object, but we consider only the distance from the Earth. So, in Astrology we can estimate a person's life with the help of Janmakundali. Finally, I conclude that ASTROLOGY is a branch of science which deals interaction of electromagnetic radiation of a human being with nine Astrological planets. ASTROLOGY of human being depends on 1. Place of birth 2. Time of birth etc parameters. Velocity of light is greater than velocity of sound, light travels through vaccum, but sound cannot travel through vaccum. The planets have certain sounds. For example, Sun produces the sound OM. Let a person recites the sound OM, then the person frequency is matches Sun's frequency. Means some energy transferred from Sun to a person. Like this each and every Astrological nine planets have its own mantras (Sanskrit words), to fulfil their life without doshas in the life of a human being.
