

SCOPE DOCUMENT

Prepared for : *Amplionix, Showroom Lead Generation Platform*

Prepared by : *Amplionix Team*

Doc No : *NA*

Date : *17-April-2025*

1 Introduction

Amplionix lead generation platform is designed to empower kitchen and cabinet Dealers & showroom owners with a new edge online presence, enabling them to effectively capture and manage leads to accelerate business growth. Through portal dealers and showroom owners can handle leads, reviews, quotes and other showroom related operations.

At the same time, customers of the showroom can explore the portal to discover a wide range of offerings, browse through more information about the showroom like about the showroom, gallery, requesting for quote, inquiry form, chat to showroom, browsing the products, sharing warranty and claim files, blog, FAQ, ordering from admin.

2 Types of users

- Visitor: Visitor is a type of user who is end user normally browsing the website of the showroom.
- Showroom owner (SO) : SO are the dealers and showroom owner who are going to take service from Amplionix to make their presence online. SO will be having their own admin login shared by Amplionix team to access all admin related features.

3 Frontend Interface (Customer Facing website)

3.1 Home Page

3.1.1 Header

The following is going to be the structure of the home page of the customer facing website for the customer.

- Top Strip
 - Email
 - Phone
 - Download Catalogue

4 Admin Interface

Admin Login

Login Using Valid Credentials

- Admin users can log in to the admin interface by entering their registered email address and password.
- Password must meet defined security criteria (e.g., minimum length, complexity).

Forgot Password

- Dealers can recover their password by using the Forgot Password Link placed on the admin login page and by entering their registered email address
- On submission the admin will receive an email having a password reset link to reset the password on the registered email address
- Clicking on the password reset link will navigate the admin to the Password Reset page on the website, where admin will be able to enter New Password & Confirm Password & Submit

5 On submission the password will be reset for the respective admin account.

Side Menu

- Side menu will consist of following
 - Dashboard
 - Customers
 - Sales
 - Quote Management
 - Order Management
 - Catalog Management
 - CMS
 - FAQ
 - Blog Management
 - Gallery
 - Banners
 - Catalog PDF

- Claim Management
- Reports
 - Contact Form Entries
 - Free Kitchen Design Requests
- Payment Processing

Dashboard

- Admin will be redirected to the Dashboard after they are successfully logged in. The Dashboard will contain the following things:

Recent Quotes:

- Displays a list of recent quotes with quick action buttons (View, Edit, Delete), along with basic details.
- Includes "Add New Quote" and "View All Quotes" calls-to-action (CTAs) for easy navigation.
- View All Quotes will take the admin to Quote List page where he will be able to access all the Quotes.

Recent Orders:

- Provides a list of recent orders with quick action CTAs for viewing, along with basic order details.

Customers

List of Customers

- A customer will be created when admin creates a Quote for the customer.
- This customer list will display a searchable and sortable list of all customers with following details.
 - Customer ID (System Generated)
 - Date Created
 - First Name
 - Last Name
 - Email
 - Contact Number
 - Country
 - State
 - Zip code
- Admin can navigate to the Customer View page by clicking on Edit icon placed Infront of each customer.
- We can give an option to export the customer information in excel/csv format.

Customer View

- On Customer view admin will be able to view all the other information of a customer under different tabs
 - Contact Information
 - Shipping & Billing Addresses Used
 - Orders Placed
 - Quotes Created
- Admin will be able to see this page from the Side menu and following will be visible to the admin
 - Filters
 - Date range
 - Email
 - Search
 - Search by Name
 - Search by Email

Sales

This Section will have two sub-categories

- Quote Management
- Order Management

Quote Management

- **Quote Listing**
 - The admin will be able to navigate to the Quote List page from the Side menu
 - The admin will be able to see “Create Quote” button on the top right of the screen
 - The admin will be able to see the Latest quotes along with the following details in a tabular form –
 - Quote ID (System Generated)
 - First Name
 - Last Name
 - Email
 - Phone
 - Quote Amount
 - Quote Status
 - Action
 - View (Will enable the admin to view the full details of the quote)
 - Admin will be able to filter out the respective quotes using the following filters
 - Quote ID
 - Created Date

- Status
- Customer Email
- Selecting View will redirect the user to Quote View Page

- **Quote View**

- The admin can access the Quote View page by clicking on the “View” icon from Quote listing page
- The admin will be able to view the following details
 - Quote ID
 - Quote Date (Created On)
 - First Name
 - Last Name
 - Email
 - Phone
 - Quote Amount
 - Quote Status
 - Billing Address
 - Shipping Address
 - Edit Quote <Button>
 - Clicking this button will enable the admin to edit the Quote if required and redirect them to Quote Creation Interface.
 - Resend Quote Email
 - Admin will get an option on Quote View page to resend the Quote Emails to the customer if required.

- **Quote Creation**

- The Admin will be navigated to this Screen through the “Create Quote” Button on the Quote Listing Page
- Admin will be able to create a Quote using the following methods
 - **Manual Entry**
 - To create a Quote manually admin and click on the CTA “New Quote” placed on Quote List page
 - Clicking on this will take the user to the New Quote creation page, where he will be able to see a table & need to enter the following information to generate the Quote
 - User Information

- Admin will get an option to select the user from existing list of customers
 - If there is no existing customer then the admin can enter the following information of a user
 - First Name
 - Last Name
 - Email
 - Contact Number
 - Address Line 1
 - Address Line 2
 - State
 - City
 - Zip code
 - Entered address will be used for both Shipping & Billing
- Product Information
 - Product Title <Input Box>
 - Product Code <Input Box>
 - Qty Selection
 - Unit Price <Input Box>
 - Subtotal
 - CTA to Add Another Item
- As we do not have the products configured in the system Admin has to manually enter each information like Product Name, Code, Qty, Unit Price.
- Based upon the QTYs entered & unit price the Subtotal column will show the amount for that product.
- Admin can add multiple products by using the CTA “Add Another Item”
- Once all the items are added admin can also add the following charges to the entire Quote to populate the Grand Total amount for the Quote
 - Shipping & Handling Charges <Input Box>
 - Tax
 - It can be entered as Flat <Input Box> OR
 - Can be (%) of Subtotal
 - User can select Flat or (%) & accordingly enter the input
 - Discount <Input Box>

- The Grand Total calculation will be ((Subtotal + Shipping & Handling Charges + Tax)-Discount)
- Once all done admin can Save the Quote
- As soon as admin saves the Quote the respective user will receive an email for the Quote which will be having all the information along with a Payment Link.
- If user clicks on the payment link he gets redirected to the Payment Processor interface where he can complete the payment.
- On successful payment completion an Order gets automatically placed in the system having the same information as Quote.

Order Management

- The admin will be able to navigate to the to the Order Management page from the Side Menu
- An order will be created in the following ways -
 - **Order Creation**
 - **Case 1: Order Creation through quote email**
 - An order is generated once the customer successfully completes the payment process.
 - The customer makes a payment after receiving a quote from the admin.
 - **Case 2: Manual Order Creation**
 - The admin will have the option to manually create an order in the system from “Create Order” Button visible under the Order listing section
 - Upon selecting the Create Order button the admin will need to fill in the following details -
 - First Name
 - Last Name
 - Email
 - Contact Number
 - Address Line 1
 - Address Line 2
 - State
 - City

- Zip code
- Enter the product Information as
 - Product Title <Input Box>
 - Product Code <Input Box>
 - Qty Selection (Can increase or decrease the qty)
 - Unit Price <Input Box>
 - Subtotal
 - CTA to Add Another Item
- Submit Order <Button>
 - The admin will be redirected to select the payment collection method.
- Admin will get to options to capture the payment
 - Pay In Person (Offline)
 - Online
- If the customer makes a payment in cash at the showroom or any other method outside the system admin can select the “Pay In Person” method & place the order.
- In this case the system will consider that the Order is Paid.
- If the payment has to be made online by customer, admin can select the Online method & place the order.
- Doing so an email will be triggered to customer having a payment link with the Order Information.
- Customer can make the payment using that link & the order’s payment status in admin will get updated automatically along with the payment information.
- Till the time the customer makes the payment the Order’s status will be shown as Payment Pending in admin & it can’t be processed further.

- **Orders Listing**

- Order List will consist of the following information in a Container box
 - Order ID (System generated)
 - Order Date
 - First Name
 - Last Name
 - Email
 - Order Amount
 - Order Status
 - View shipping details of the customer.
 - Create Order <Button>
- The following can be the filter options on order listing
 - Order ID
 - Order Status
 - Date Range
 - Customer Email
 - Search
 - Search by Order ID / Name / Email / Product Title

- **Order View**

- The admin can view the order details by selecting a container box from the order list.
- Order Details will consist of the following data
 - Order ID (System generated)
 - Order Date
 - Customer ID
 - First Name
 - Last Name
 - Email
 - Contact Number
 - Shipping Address
 - Billing Address
 - Product title with Quantity and Subtotal
 - Payment Info, Status and Method (Paid / Pending)
 - Until the customer has paid, the Payment Status will be shown as pending
 - Order Tracking
 - Will be able to enter the Order Tracking information

- It can be passed in the Order email to customer as well.
 - Order history Logs
 - Dropdown to update the order status
 - Processing
 - Shipped
 - When an Order is placed by default it's status will be Processing.
- **Status Management:**
 - Allow administrators to update order statuses (e.g., Processing, Shipped).
 - As of now we will be having only two Order Statuses.
 - Admin can enter order tracking information from Order Details Page
 - Automatically send email notifications to customers with order updates (Only on Status Updates).

Catalogue Digitalization

Admin will get a Catalog option in the side menu. It will be having the following sub menus

- **Categories**
 - Admin will be able to configure the different parent categories & subcategories (Style) under those parent categories.
 - Parent Category Examples
 - Kitchen Cabinets
 - Bathroom Cabinets
 - Floorings etc.
 - Subcategory Examples (Under Kitchen Cabinets)
 - Dove Shaker
 - Aria Blue etc.
 - Admin will be able to view & manage all the categories from this section.
 - Admins will have the ability to control category visibility on the homepage using a checkbox feature on the category level.
 - Each category, across all levels, will have a checkbox option.
 - If a category is checked, it will appear on the homepage.

- **Products**
 - We will not be having any SKUs on the website

Appointment Management (Schedule a Call)

- In the 1st Phase i.e. MVP Admin can manage the appointments through Calendly Interface
- There won't be any section in the admin to Manage the Appointments

CMS

- Following CMS pages, we are going to have
 - Blogs
 - FAQs
 - Gallery
 - Services
 - Financing
 - Sales Offers
 - Terms & Conditions
 - Privacy Policy
 - About Us
 - Contact Us

Blog Management

- **Access Blog List:**
 - Navigate to the Blogs Management section via the admin dashboard.
 - Select the "Blog List" option to view all existing blogs.
- **View Blog Details:**
 - Each blog is displayed in a tabular format with the following columns:
 - Blog Title
 - Author Name
 - Published Date
 - Category
 - Status (Published/Draft/Archived)
 - Action Buttons (Edit, Delete, Preview)

○

FAQ Management

- Amplionix will provide the dealers/showroom owners with a repository of FAQ's.
- Dealers can choose the FAQ's they want to showcase on their websites.
- Dealers can also add new FAQ for their business.
- Edit, delete, and organize FAQ entries. (Only for self-created FAQ's)
- Support for bulk import/export of FAQ data using CSV.
- Assign categories to FAQs for better organization (e.g., Shipping, Payments, Products).

Gallery

- Admin will be able to view the current photos and can perform CRUD action.
- Admin will be able to see a "Add Photo" button and can add photos.
- Admin shall be able to create different categories as well to upload the pictures under those categories.
- We will have a flag under the gallery images in admin to define which images to be shown on the Home Page under Featured Images.

Banners Management

- Admins can upload new banners to be displayed on the homepage.
- Admins can mark existing banners as inactive or active as needed.

Catalog PDF

- Admins can upload the latest catalog PDF through this section.
- Only one PDF can be uploaded at a time; uploading a new file will replace the existing one.
- The uploaded catalog PDF will be accessible to customers via the Catalog option in the top menu strip on the front end.
- If no catalog PDF is uploaded, the Catalog option will not be visible to customers on the front end.

Claim Management

The admin will be able to perform the following actions

- **View Claim Listings**
 - View a centralized list of all customer claims, including status (e.g., pending, approved, rejected).
- **Claim Details**

- Display detailed information about individual claims, including the reason for the claim, related orders, and any supporting documents.

Web Chat and Texting

- Admin has to login to Birdeye/twak Portal to view & reply to the messages received from the users.

Reports

The admin will be able to download the following reports

- **Free Kitchen Design Requests**
 - The admin will be able to see the list of Free Kitchen design (FKD) requests from here.
 - The admin will be able to see the full details of FKD requests along with information filled in the form and files uploaded as attachments.
 - Admin will be able to download the requests generated through Free Kitchen Design form in excel format.
 - Admin will be able to filter out these requests based on the Date Range.
- **Contact Us Form Entries**
 - Admin will be able to download the Contact Us form enquiries in excel format.
 - Admin will be able to filter out these requests based on the Date Range.

Payment Processing

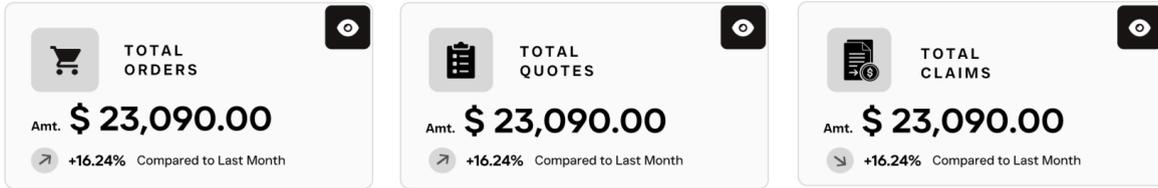

- Authorize.net Keys & Enable/Disable configuration we will be providing in admin.
- Affirm integration will be there for financing

Notifications and Emails

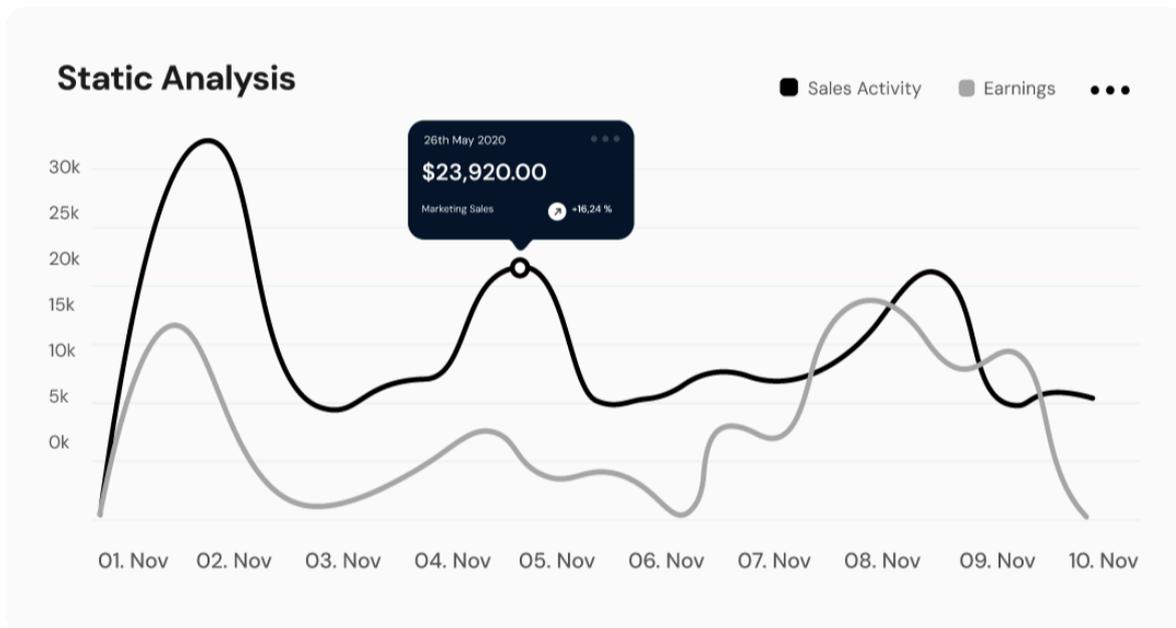

- The admin receives the following notifications
 - Contact Form Submission
 - FKD Form Submission
 - Claim Form Submission
 - Sample Order
 - Making a Payment of Quote
 - New Order Email
