Abstract- Dental ailments are frequently responsible for or predispose to diseases in other parts of the body, as gastric disorders, arthritis, maxillary sinusitis and bacterial endocarditis. Delayed dentition may be due to malnutrition or vitamin deficiencies. A premature eruption of teeth is of no pathological significance. Malnutrition also affects susceptibility and calcium deficiency due to health disorders. Teeth grinding habit common in childhood, particularly during sleep due to nervousness, jaw tension, dentitional disorder, delayed dentition, jaw pain, tenderness, toothache, diarrhoea during dentition period, lack of sleep or improper digestion. Food insecurity for limited availability of food, leading to irregular or inadequate food intake. Poverty- Family struggling financially may struggle to afford nutritious food. Lack of breastfeeding – failure to exclusively breastfeed in the first six months, leading to inadequate nutrition. Inadequate healthcare-Limited access to healthcare services, vaccinations and preventive care. Digestive issues- like diarrhoea, vomiting, or intestinal worms can lead to malabsorption of nutrients. Chronic illness- Conditions like tuberculosis, or chronic infections can increase the risk of health disorders. According to holistic concept of homoeopathy Calcarea Phosphorica 12x is very effective and improved the health of children during dentition complain.

Key Words- Calcarea Phosphorica 12X, contributing factors dentition complain, holistic concept, Homoeopathic approach, susceptibility.

INTRODUCTION

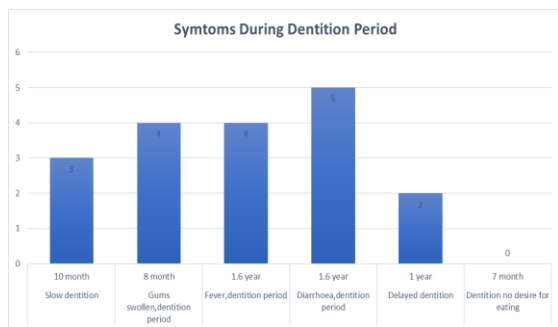

Calcarea Phosphorica corresponds to poor nutrition, whether of childhood, slow development of teeth, slow walking, malassimilation, essential to the proper growth and nutrition of the body, and gives solidity to the bones. Important features of Calcarea Phosphorica 12X is restorative power after acute diseases development delay and general debility.

Calcarea Phosphorica is especially indicated in delayed dentition and trouble incident to that period, teeth develop slowly, rapid decay of teeth, complaints during teething, convulsion without fever, teeth sensitive to chewing. Teeth soft and decay easily.
