**Abstract—** Model United Nations (MUN) conferences provide experiential learning opportunities that simulate real-world diplomacy and governance. This study examines the educational impact of a multi-committee MUN conference conducted in 2025, involving committees such as AIPPM, UNSC, UNGA, and UNHRC. Delegates debated critical issues including education reforms, global security, trade disputes, and human rights violations. Through structured debates, crisis simulations, and resolution drafting, participants developed political awareness, leadership qualities, negotiation skills, and global perspectives. The findings indicate that MUN participation enhances critical thinking, public speaking, teamwork, and problem-solving abilities, making it a powerful tool for civic education and holistic student development.

**Index Terms—** Model United Nations, Experiential learning, Political awareness, Diplomacy skills, Leadership development, Civic education

## I. INTRODUCTION

Model United Nations (MUN) is an academic simulation of the United Nations where students represent different countries and deliberate on global issues. Such conferences aim to foster awareness of international relations, diplomacy, and policy-making processes. The KRM MUN 2025 conference featured multiple committees addressing diverse global challenges, providing participants with a platform to engage in meaningful dialogue and collaborative problem-solving.

## II. OBJECTIVES OF THE STUDY

1. To evaluate the role of MUN conferences in enhancing political and global awareness.
2. To assess the development of leadership, negotiation, and communication skills among participants.
3. To examine the effectiveness of crisis simulations in improving decision-making abilities.
4. To understand the contribution of experiential learning to civic education.

## III. RESEARCH METHODOLOGY

This study adopts a qualitative case study approach based on observations of the KRM MUN 2025 conference. Data was derived from committee proceedings, delegate interactions, and outcomes of debates and resolutions. The analysis focuses on educational outcomes rather than political positions.

## IV. COMMITTEE ANALYSIS

The conference included several committees addressing distinct global issues. The AIPPM committee deliberated on reforms in the National Education Policy to ensure inclusive learning in India. The UNSC committee focused on peace-building and conflict resolution in the Middle East, emphasizing diplomacy amid crises. The UNGA discussed global tariff disputes and multilateral trade cooperation, highlighting economic interdependence. The UNHRC

addressed human rights violations in conflict zones, incorporating crisis simulations to test delegates' responsiveness and ethical reasoning.

#### V. SKILL DEVELOPMENT AND LEARNING OUTCOMES

Participation in the conference enhanced several competencies among students. Delegates developed public speaking confidence, analytical thinking, negotiation skills, and teamwork abilities. Crisis scenarios required rapid decision-making and adaptability, while drafting resolutions encouraged collaborative problem-solving and policy formulation.

#### VI. DISCUSSION

The findings suggest that MUN conferences serve as effective platforms for experiential learning. By simulating real-world governance structures, students gain insights into global challenges and the complexities of international cooperation. The collaborative environment promotes mutual respect, cultural awareness, and democratic values.

#### VII. CONCLUSION

This study concludes that MUN conferences significantly contribute to students' intellectual and personal development. They enhance political awareness, diplomacy skills, leadership qualities, and global understanding. Integrating such simulations into educational frameworks can prepare students for responsible citizenship and future leadership roles in an increasingly interconnected world.
